about us

FIRST is a global robotics organization that inspires young people to become science and technology leaders. Through FIRST Tech Challenge (FTC), our teams engineer robots, compete in challenges, and develop real-world skills in programming, design, problem-solving, and collaboration. Beyond competition, we share knowledge, mentor others, and inspire more students to explore STEM.

FIRST TECH CHALLENGE

We are NIS Nura Robotics Lab, a robotics community at Nazarbayev Intellectual School in Astana, Kazakhstan. Our lab brings together two teams — xCeption and xCellence — united by a passion for engineering, innovation, and teamwork. Together, we design, build, and program robots while developing the next generation of STEM leaders.

our achievements

xCeption

Finalist Alliance Captain 2x

Innovate Award

Control Award 2nd Place

Control Award Winner

Ladies FIRST Regional winner

Winning Alliance Captain 2x

Inspire Award 2nd place

Think Award 3rd Place at the FIRST World Championship

xCellence

Winning Alliance Captain 2x

Inspire Award 3rd place

Inspire Award 2nd place

Think Award winner

Design Award winner

Think Award 2nd place

OUR SUCCESS IS BUILT TOGETHER!

Our achievements are the result of dedication, teamwork and a passion for engineering. Every challenge has made us stronger, and every victory has brought us one step further.

We are proud of what we have accomplished and grateful to everyone who has supported our journey.

Together, we turn ideas into innovation and challenges into victories!
